RISHABH KUMAR PANDEY

Full-Stack Engineer • React.js • Node.js • TypeScript • AI Application Development

Pune, India • +91 86175 88984 • rishavforjobs22@gmail.com • linkedin.com/in/rishabhpandey2611 • github.com/Rishabh-GitRepo

PROFESSIONAL SUMMARY

- Full-stack engineer with **2+ years** at Accenture building enterprise banking applications with **React.js, TypeScript, Node.js**, and REST APIs — covering UI component architecture, performance optimization, secure auth, real-time WebSockets, PL/SQL, and containerized microservices deployment.
- Specializing in **AI-powered application development** — offline LLM pipelines (**Whisper.cpp, Ollama, Silero VAD**), real-time speech and GenAI integration using Tauri/Rust, and production deployment with **Docker and Kubernetes**.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL
Frontend: React.js, Next.js, React Hooks, Redux Toolkit, Context API, Tailwind CSS, Webpack, Babel
Backend & APIs: Node.js, Express.js, REST APIs, WebSockets, Socket.IO, JWT, OAuth 2.0
AI / GenAI: LLMs, RAG, Ollama, Whisper.cpp, Silero VAD, Piper, MediaPipe, Groq, Gemini
Databases: MongoDB, PostgreSQL, SQL, Redis
DevOps & Testing: Docker, Kubernetes, Git, GitHub Actions, Jenkins, GitLab CI, Jest, Agile/Scrum

PROFESSIONAL EXPERIENCE

Accenture *2024 – Present*

Associate Software Engineer

Domain: *Enterprise Banking Applications — React.js, TypeScript, Node.js, REST APIs*

▸ **Key Contributions**

- Built and maintained enterprise banking features using **React.js, TypeScript, and Node.js**; delivered REST APIs with async handling, caching, and error management.
- Developed a reusable component library using **React Hooks, Redux Toolkit, Context API, and Tailwind CSS**; optimized rendering with **useMemo, useCallback, lazy loading, and code splitting**.
- Designed and optimized **PL/SQL stored procedures, SQL queries, and indexes** for high-volume banking data; secured access with **JWT and OAuth 2.0**.
- Implemented real-time chat using **WebSockets and Socket.IO**; containerized and deployed microservices with **Docker and Kubernetes**; integrated third-party APIs with retry logic and monitoring.

PROJECTS

AI Interview Coach *Tauri • Rust • TypeScript • Whisper.cpp • Ollama • Silero VAD • Piper • MediaPipe • Groq / Gemini*

github.com/Rishabh-GitRepo/ai-interview-coach | Active Development

- Building a cross-platform desktop interview coach using **Tauri and Rust** — fully offline-capable with no cloud dependency for core AI functions.
- Engineered a local AI pipeline combining **Whisper.cpp (STT), Ollama (LLM), Silero VAD (voice detection), and Piper (TTS)** for end-to-end offline speech processing and AI-driven interview interaction.
- Integrating **MediaPipe with Groq/Gemini** for real-time behavioral and facial analysis with AI-generated interview feedback.

AI Tutor — Real-Time Learning Platform *React.js • Next.js • Node.js • Socket.IO*

github.com/Rishabh-GitRepo/ai-tutor | Active Development

- Building a real-time AI-assisted learning platform with **React.js/Next.js** frontend and **Node.js** backend; implemented live sessions using **Socket.IO**.
- Applied code splitting and lazy loading to reduce initial load time by **~30%**.

Additional Projects

- **Real-Time Chatbot** — React.js, Node.js, WebSockets: customer support chat with real-time delivery and persistence.
- **Performance Optimizer** — React.js, TypeScript, Webpack, Babel: lazy loading and code splitting; load time −30%.
- **Auth System** — React.js, Node.js, JWT, OAuth 2.0, MongoDB: role-based access control and session management.
- **Microservices Pipeline** — Docker, Kubernetes, Jenkins, GitLab CI: blue-green deployment with zero-downtime releases.

EDUCATION

Sir M. Visvesvaraya Institute of Technology, Bengaluru — B.E. Information Science | 2020 – 2024
